(b) whether Government would consider to fix the rate of service tax between 12.5 per cent to 7 per cent in order to check inflation;

(c) if so, by when; and

(d) if not, what will be the extent of loss of revenue to Government as a result thereof alongwith the details thereof, State-wise?

THE MINISTER OF STATE IN THE MINISTRY OF FINANCE (SHRI PAWAN KUMAR BANSAL): (a) to (d) Inflation measured in terms of wholesale Price Index reached 7.33 per cent as on April 12, 2008. Increase in prices of coal, mineral oil products, iron ore, and basic metals and alloys comprising iron and steel, foundries for casting and forgings and pipes and wires were among the factors contributing to inflation in recent weeks.

Service tax is levied at the rate of 12 per cent of the value of taxable services. CENVAT rate for manufactured goods is 14 per cent. It is the policy of the Government to converge the rates between goods and services consistent with the Government's declared intention of moving towards a composite Goods and Services Tax (GST) by April 2010. Service tax paid on services used as inputs in the manufacture of excisable goods is available as credit and is only a pass-through. At present, there is no proposal under consideration of the Government to revise the applicable rate for levy of service tax.
